KEY HIGHLIGHTS

Ecommerce Platforms

Carson Reinke

PROFILE

Seasoned and detail-oriented Full Stack Developer with extensive hands-on experience in building and maintaining hundreds of websites across the IT field. Self-motivated and driven, with a proven ability to complete tasks independently while excelling in leadership and team collaboration.

Recognized as a confident leader and clear communicator who sets high standards for both personal performance and team outcomes. Adept at analyzing complex requirements with persistence and precision, ensuring all possible solutions are explored.

Skilled in technical leadership, project direction, mentorship, troubleshooting, and execution. Capable of setting up and delivering a wide range of projects, ensuring immediate and lasting success.

EXPERIENCE

Software Engineer

Stripe *August 2021 – Present*

Contributed to core engineering initiatives, delivering scalable solutions and collaborating across teams to ensure technical excellence.

Tech: Java, Ruby, Mongo

Software Engineer

TaxJar *November 2020 – August 2021*

Supported development efforts for tax automation products, improving reliability, performance, and developer experience.

Tech: Ruby, Rails, Postgres

Development Manager

Brand Labs | Ecommerce agency *June 2017 – June 2020*

Provided technical leadership and day-to-day management for an 8-person development team. Defined coding standards, deployment procedures, and project documentation. Reviewed work for quality, assisted sales with technical estimates, and architected ecommerce projects and products. Maintained hands-on development alongside management responsibilities.

Tech: Node.js, PHP, Laravel, MySQL

Technical Products Manager

Brand Labs | Ecommerce agency *July 2011 – June 2017*

Managed and enhanced Autoresponder Max, an email remarketing SaaS platform. Expanded testing coverage, oversaw hosting infrastructure, and contributed product ideas to drive sales. Led feature development and platform improvements.

Tech: Ruby, Rails, MySQL, Redis

Developer

Brand Labs | Ecommerce agency *October 2007 – October 2011*

Established the company's development team and procedures for ecommerce store theme implementation on the Volusion platform. Created efficient processes to transform design compositions into production-ready projects, enabling high-volume delivery.

Tech: PHP, ASP, MySQL, SQL Server

Software Developer

Marketing Associates | Marketing incentives agency

September 2004 – October 2007

Developed and maintained Java-based web and desktop applications for large-scale automotive incentive and rewards programs, utilizing J2EE frameworks with Oracle databases to improve functionality, data integrity, and business rule implementation.

Developer

Sv3 Media Group | Web development agency *August 2002 – September 2004*

Served as Technical Lead delivering high-traffic web applications and enterprise tools using the Microsoft technology stack with SQL Server, collaborating directly with clients to define requirements and implement award-winning, scalable solutions.

EDUCATION

Bachelor of Science in Computer Science *1998 – 2002*
Lawrence Technological University, Southfield, MI

Professional Scrum Developer (PSD I)
